Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A mobile terminal comprising:

a display having at least one menu section for displaying ~~a predetermined function from~~ a plurality of functions and at least one tag section for displaying a name of said menu section corresponding to the tag section;

an input unit where a selection key and an entry key are disposed; and

a controller connected to said input unit and said display, the controller being configured to:

(a) in response to a first selection of a tag section by the selection key, control the display so as to display the plurality of functions in the menu section corresponding to the tag section that was selected; and

(b) in response to a second selection of one of the plurality of functions displayed in the menu section, controlling the mobile terminal so as to transmit a signal to a device causing the device to carry out the function that was selected

~~wherein a plurality of tags are displayed on said tag section, and said controller displays contents of one of said tags, after being selected using said selection key, on said menu section, and the predetermined function selected in said menu section is displayed larger than other functions from the plurality of functions.~~

2. (Currently Amended) The mobile terminal as defined in Claim 1, wherein said selection key has an approximately cylindrical shape, said selection key being ~~rotated~~ rotatable in one of vertical and horizontal directions for selecting an item in one of said menu section and said tag section.

MAT-8432US

3. (Currently Amended) The mobile terminal as defined in Claim 2, wherein ~~a~~ the plurality of functions displayed in said menu section are disposed in an approximately circular arc.
4. (Canceled)
5. (Original) The mobile terminal as defined in Claim 1, wherein at least one of said selection key and said entry key is made of a transparent touch panel disposed on a front face of said display.
6. (Currently Amended) The mobile terminal as defined in Claim 1, wherein a plurality of selected functions are selected from amongst the plurality of functions displayed in the menu section by operating said selection key, and a combination of said selected functions is stored in said controller as a new function.
7. (Currently Amended) The mobile terminal as defined in Claim 6, wherein the new function is stored in said controller if said selection key is selected by continuously operating said selection key for a predetermined time ~~is stored in said controller as a new function.~~
8. (Original) The mobile terminal as defined in Claim 1, wherein said controller detects a state that said input unit is not operated for a predetermined time, and turns off said display.
9. (Currently Amended) The mobile terminal as defined in Claim 1 further comprising a transmitter, wherein the transmitter is configured to transmit the signal to the device as an infrared optical signal in response to ~~for receiving an electrical signal from said controller and outputting said electrical signal in the form of an infrared optical signal.~~
10. (Original) The mobile terminal as defined in Claim 1 further comprising a receiver for receiving an infrared optical signal and converting said infrared optical signal to an electrical signal.
11. (New) The mobile terminal as defined in Claim 1,
